

**FURNITURE FOR
BETTER LEARNING**

Line 22/23

We understand that manufacturing furniture for the educational segment goes far beyond simply generating objects that fulfill a basic function, such as the chair to sit on and the table to support the handling of study material. For us, making school furniture is contributing to good teaching and learning. Our purpose is to fulfill a social function.

We develop and manufacture high quality products through ethical and responsible conduct. We commit to high technology, knowledge and constant improvements to transform furniture into solutions that provide comfort, ergonomics and practicality to meet the needs and profiles of each age group of students.

INDIVIDUAL TABLES

From the smallest to the biggest of the class, everyone can count on a comfortable table to carry out their activities. They are easy to clean and produced in age-appropriate sizes. The plastic protection on the table legs, even in contact with the child's feet, protects the furniture and prevents it from wearing out.

DIFFERENTIALS

Structure

Carbon steel tubes with anti-corrosion treatment, laser cut, robotic MIG welding and splash-free painting on the surface.

Bookcase

They have very resistant steel book holders with adequate space to accommodate school materials.

Ferrules and casters

Exclusively designed toe caps to provide greater protection to the feet. Option of models with 2 or 4 wheels with PU tread that facilitate mobility.

Artboard rotation and adjustment system

They have a modern structure that allows the adjustment of the position and rotation of the drawing board through the 2 rotation axes, favoring the layout for the entry and exit of the student and more comfort for right and left-handers.

ARIA FREE CHAIRS

The Aria Free chair line has ergonomics designed to ensure the best posture for the user and comfort for longer.

CABINETS AND BOOKCASES

The Metadil line of shelves and cabinets for early childhood education is intended to meet the main needs of schools. Organization and order of teaching materials are important so that spaces are better used, in addition to making the environment more pleasant.

Website

Main features

A. Steel base with feet adjustable to the unevenness of the floor.

B. Metal wheels with brake.

C. Folding key that reduces the risk of accidents. Rounded metal handles with anodized finish.

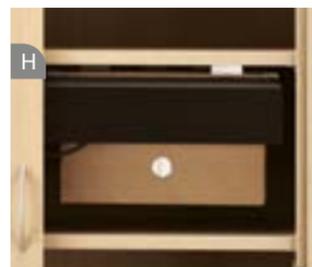

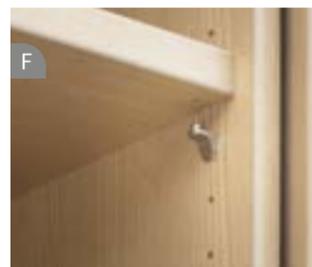

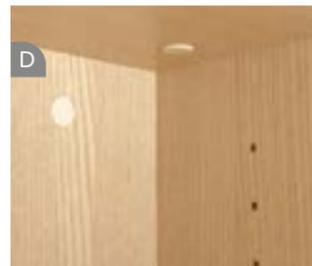

D. Mounting system without visible screws.

E. Metal hinges with nickel-plated finish, they have an exclusive safety device against crushing and allow the door to be opened up to 270°.

F. Metal shelf support with safety pin that prevents the shelves from sliding. The holes on the sides every 32 mm allow the installation of accessories and separate shelves. All edges have rounded corners for user safety.

G. Cremone type lock with three locking points for pivoting doors.

H. Optional PS-92 hanging folder drawer. Compatible with cabinets with a depth of 45 cm, except models with sliding doors.

SHELVES

A good way to organize the amount of toys in the classroom is to store the pieces on shelves. In addition to making the environment more beautiful, they are a great relief when it comes to cleaning up all the mess after an intense day of playing.
